**Electric Fence Post  
Heavy Duty**

with pig tail insulator  
6.5mm and 8 mm spring steel post  
use to support a temporary fence line

## 4081

The Chin Ball Mating Harness Leather is a "must have" aid for "bulling". The Cow chin ball harness attaches comfortably and safely to a teaser bull and is totally adjustable. The Chin Ball Mating Harness Leather is a strong and robust halter that fits under the bull's chin to determine the identity of the cows which have been mated with a particular bull or if a teaser is used which one is in heat. The Chin Ball Mating Harness Leather is fitted with a stainless steel ball which is filled with marking fluid that acts like a ballpoint pen which marks the mounted cow. The reservoir holds enough fluid for 25 - 30 markings and is refilled quite easily.

### Features of The Chin Ball Mating Harness Leather

- 1- Comfortable and safe for the Bull
- 2- Adjustable size
- 3- Strong and robust
- 4- Stainless steel ball
- 5- Acts like ball point pen

**Material:** Grain Leather
